| The MAILING DATE of this communication appears on the cover sheet with the correspondence address Period for Reply | | | | | | | | |
| A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION. - Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication. - If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely. - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication. - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). - Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b). Status | | | | | | | | |

Application/Control Number: 10/017,743 Page 2

Art Unit: 3739

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-124, drawn to an endoscope, classified in class 600, subclass 107.
- II. Claims 125, drawn to endoscope, classified in class 600, subclass 104.
- III. Claims 126-130, drawn to an endoscope, classified in class 600, subclass 154.
- IV. Claim 131, drawn to an endoscope auxiliary instrument attachment member, classified in class 600, subclass 102.
- V. Claims 132-135, drawn to methods for endoscopically performing diagnosis, classified in class 600, subclass 106.

The inventions are distinct, each from the other because of the following reasons:

- 2. Inventions I is unrelated to the other inventions. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions have different modes of operation, different functions and different effects. Invention I is concerned with a particular guide wire fixing means used with a particular endoscope (one with a tool raising platform) where the other inventions are not.
- 3. Inventions II, III and IV are unrelated to each other as well as to the other inventions. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). Each of these inventions are directed to particular types of attachment mechanisms that are structurally different and thus function differently.

Application/Control Number: 10/017,743

Art Unit: 3739

4. Inventions V and the remaining inventions are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case method as claimed does not require the particular structure claimed in inventions I-IV and the apparatus can be practiced by another materially different apparatus or by hand.

Page 3

- 5. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, and the search required for any one group would not be inclusively required for any other group, restriction for examination purposes as indicated is proper. To evidence the requirement of "serious burden", it is noted that the application of such requirement affects both search and examination of the claimed patentably distinct inventions. Therefore, as much as the search for the distinct inventions might overlap to a certain extent, there still exists the burden of separate analysis of the prior art references for each distinct invention, as well as a separate written analysis in the Office Action.
- 6. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
- Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Art Unit: 3739

Any inquiry concerning this communication or earlier communications from the examiner should be directed to John P. Leubecker whose telephone number is (703) 308-0951. The examiner can normally be reached on Monday through Friday, 6:00 AM to 2:30 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Linda C.M. Dvorak can be reached on (703) 308-0994. The fax phone number for the organization where this application or proceeding is assigned is (703) 872-9306.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is (703) 308-0858.
